Markham Textile Diversion Strategy

Claudia Marsales
City of Markham, Senior Manager
Waste & Environmental Management
• 350,000 residents
• @90,000 single family homes
• Provide collection to both homes and multi-res
• 4 Community Recycling Depots
• Bi-weekly garbage/weekly green bin and blue box
• 2005-2013 had 70% curbside diversion rate
In 2012, Markham’s Diversion Committee developed a package of diversion initiatives designed to increase diversion to 80%, and move Markham closer to Zero Waste.

Markham’s successful ‘Best of the Best’ diversion strategy contained ten diversion initiatives......
New Diversion Initiatives

1. Mandatory Material Separation By-law
2. Unlimited Clear Bags for Residue
3. **Expanded Textile Diversion Program**
4. Zero Waste for Schools Program
5. Establish Retail Bag Policy for Markham
6. Enhanced Promotion & Education
7. Reuse Depot for Renovation Materials
8. Curbside Electronics and Battery Collection Ban
9. Establish Spring/Fall Clean-up Days
10. Expanded Fall Leaf/Yard Material Collection
A major shift has been underway resulting in a growing amount of inexpensive, low cost, ‘disposable’ clothing being sold into the North American marketplace.

Known as ‘Fast Fashion’, inexpensive trendy clothing is designed and priced to be bought, worn, then quickly discarded.

The low cost of fast fashion can only be achieved because more than 98% of all garments sold in Canada are made off shore.

Fast Fashion has a huge carbon footprint.
Municipalities leave textile collection exclusively to ‘charity’ and for-profit collection companies.

These so-called ‘charity’ boxes have posed a real challenge for GTA municipalities over the past several years.
Little available information on textiles
Markham held 2 Focus Group sessions
20 female head of households
Women are the purgers in the family
Newlyweds/empty nesters/varied cultures
What are residents doing with their textiles?

What can be donated?

What goes in the garbage?

What role does Markham play?

What role does ‘charity’ play?

What solutions would work to divert textiles?
Focus Group Results

• **Little understanding of what textiles are suitable for donation**
  – unaware that towels, sheets, purses, belts, and shoes etc. can be recycled. Most placed in garbage

• **Would willingly recycle textiles**
  – wanted more education on textile recycling

• **Strong confidence in Markham sponsored diversion programs**
  – would use a Markham managed textile recycling program if available
Focus Group Results

- Do not donate “personal” or uncomfortable items
• Preferred 24/7 drop off system or home collection service

• Used charity boxes for their convenience
  – had little allegiance to charitable causes
Focus Group Results

- Would only donate name brand clothing
  - Not Joe Fresh

Profile of Charities

Low- medium awareness

- The Salvation Army
- Thrift Store
- Value Village
- Goodwill

High awareness

- SickKids
- Canadian Diabetes Association
- Children's Wish Foundation
- Heart & Stroke Foundation

• Is there an ethnic gap in awareness/behaviour?
• Low-medium community presence - telemarketing?
Test Concepts

✔ YES! Environmentally friendly options to landfill

✔ YES! Higher profile for charities

✔ YES! Tell us what happens to diverted textiles

✔ YES! New branded donation containers in safe places
• 7400 tonnes of textiles were collected at Recycling Depots even before the start of Markham’s Textile program
• Trailer used for Goodwill collection at Thornhill Recycling Depot

• City of Markham is now using this trailer as part of our program for textile collection
Textile recycling program approved 2016 Capital Project $67K

- Matching grant of $67K from the Federation of Canadian Municipalities (FCM) for Markham’s textile recycling program

- FCM commented positively on Markham’s application noting the initiative was not only unique, it addressed increased diversion, consumer education, and green house gas reduction.
Partner - The Salvation Army

• Founded in 1865 and designed to meet the needs of all humans without discrimination

• Donated goods and household items are recycled or sold in Thrift Stores to help residents in the areas in which they operate

• Once operating costs are covered, 100% of all proceeds go towards supporting the charity

• Thrift stores are operated by The Salvation Army’s National Recycling Operations division
Founded in 1953 to support people living with diabetes through research, advocacy, education and services

Donated clothing is recycled though the Clothesline program or sold in Value Village stores with 100% of the net proceeds supporting the CDA and diabetes research, education and advocacy

The Clothesline program diverts more than 51 million kg of clothing from landfills across Canada
New bins at 9 Fire Stations and recycling depots
24/7 security
Serviced by Salvation Army
All textiles accepted
Equipped with sensors
• Partnership with Canadian Diabetes Association
• 18 buildings on a pilot run
  – 5 multi-res buildings already had donation bin prior to program
  – Potential for 70 bins
• Donation bins are smaller to accommodate space restrictions
Markham’s Donation Bin

- Low carbon footprint
  - Zero electricity in manufacturing
  - Recyclable materials
  - Made by Mennonites- arrive by horse & buggy

- Added Security
  - Located at civic facilities
  - Solar lighting
  - Security cameras

- Serviced by Salvation Army

- Smart technology
Donation bin at Civic Centre
• **Goals:**
  – By 2018 - 60+ donation bins managed by Markham
  – Tougher By-laws to address rouge bins on private property
  – Eliminate non-Markham donation bins

• **2017** - ban textiles from garbage/residue

• Increased public education and awareness on true cost of fast fashion
Textiles - next for EPR?

• Textile manufacturers' not paying true cost of their product

• All textiles have logo and labels

• Calling on Ontario Provincial government to include textiles as EPR product – Cradle to Grave
Council Support
